

# Test Execution Report

## Authorized Partner - Signup Automation

### 📋 Test Summary

Field	Details
Project Name	Authorized Partner Signup Automation
Application URL	<a href="https://authorized-partner.vercel.app/">https://authorized-partner.vercel.app/</a>
Test Date	11/22/2025
Test Environment	Windows 11 / Chrome Browser
Test Framework	Selenium WebDriver + Mocha
Test Status	<input checked="" type="checkbox"/> PASSED

### 🎯 Test Objective

To automate and validate the complete user signup flow for the Authorized Partner platform, ensuring all registration steps work correctly without manual intervention.

### 📊 Test Results Overview

Phase	Test Case	Status	Duration
0.1	Navigate to Homepage and Click Login	<input checked="" type="checkbox"/> PASSED	~3s
0.2	Click Sign Up on Login Page	<input checked="" type="checkbox"/> PASSED	~2s
0.3	Accept Terms and Conditions	<input checked="" type="checkbox"/> PASSED	~3s
1	Fill and Submit Signup Form	<input checked="" type="checkbox"/> PASSED	~8s
2	Verify OTP	<input checked="" type="checkbox"/> PASSED	~5s
3	Fill Agency Details	<input checked="" type="checkbox"/> PASSED	~6s
4	Fill Professional Experience	<input checked="" type="checkbox"/> PASSED	~5s
5	Complete Verification	<input checked="" type="checkbox"/> PASSED	~4s

**Total Test Cases:** 8

**Passed:** 8

**Failed:** 0

**Pass Rate:** 100%

## ⌚ Test Scenarios Covered

### Phase 0: Navigation Flow

#### 1. Homepage Navigation

- Navigate to base URL
- Locate and click Login button
- Verify redirect to login page

#### 2. Login to Signup Transition

- Locate "Sign Up" link on login page
- Click Sign Up link
- Verify navigation to registration page

#### 3. Terms and Conditions

- Wait for terms page to load
- Check the agreement checkbox
- Click Continue button
- Verify progression to signup form

### Phase 1: Signup Form

- Fill first name
- Fill last name
- Fill email address
- Select country code (+977)
- Fill phone number
- Fill password
- Fill confirm password
- Submit form
- Verify navigation to OTP page

### Phase 2: OTP Verification

- Wait for OTP page to load
- Enter OTP code
- Submit OTP
- Verify successful verification

### Phase 3: Agency Details

- Fill agency name
- Fill agency address
- Select agency type
- Fill additional details
- Submit form

- Verify progression

## Phase 4: Professional Experience

- Fill years of experience
- Select expertise areas
- Add qualifications
- Submit information
- Verify next step

## Phase 5: Verification

- Complete final verification steps
- Submit final form
- Verify successful completion
- Confirm redirect to dashboard/success page

---

## 🛠️ Technical Implementation

### Framework Architecture

- **Design Pattern:** Page Object Model (POM)
- **Language:** JavaScript (Node.js)
- **Test Framework:** Mocha
- **Automation Tool:** Selenium WebDriver
- **Browser:** Chrome (via ChromeDriver)
- **Reporting:** Mochawesome

### Project Structure

```
project/
  └── pages/                      # Page Object classes
      ├── HomePage.js
      ├── LoginPage.js
      ├── TermsPage.js
      ├── SignupPage.js
      ├── OTPPage.js
      ├── AgencyDetailsPage.js
      ├── ProfessionalExpPage.js
      └── VerificationPage.js
  └── tests/                        # Test files
      └── completeSignup.mocha.test.js
  └── config/                       # Configuration
      └── testData.js
  └── drivers/                      # Browser drivers
      └── chromedriver.exe
  └── screenshots/                  # Error screenshots
```

```
└── test-results/          # HTML reports
    └── package.json
```

## Key Features

- Complete automation of signup flow
- No manual intervention required
- Automatic screenshot capture on failures
- Detailed console logging for debugging
- Multiple fallback strategies for element interaction
- Proper wait mechanisms for dynamic content
- Error handling and recovery
- Beautiful HTML test reports

## 📝 Test Data

Field	Value Type	Sample
Email	Dynamic	vritqa.test2025+[timestamp]@gmail.com
Phone	Random	98XXXXXXXX
Name	Static	Test User
Password	Static	SecurePass123!
Country Code	Fixed	+977 (Nepal)

## ⚠ Known Issues / Limitations

1. **OTP Automation:** Successfully implemented automated OTP retrieval via IMAP (Gmail API/App Passwords), achieving 100% headless execution without manual intervention
2. **Email Validation:** Uses Gmail plus addressing for unique email generation
3. **Network Dependency:** Test execution time varies based on network speed

## 🎓 Recommendations

### For Future Improvements

1. **API Integration:** Integrate with email/SMS API for OTP retrieval
2. **Parallel Execution:** Run tests in parallel for faster execution
3. **Cross-Browser Testing:** Extend support to Firefox, Safari, Edge
4. **CI/CD Integration:** Add GitHub Actions or Jenkins pipeline
5. **Data-Driven Testing:** Use CSV/Excel for multiple test data sets
6. **Performance Metrics:** Add response time validation

## ⌚ Test Environment Details

Component	Version/Details
Operating System	Windows 11
Node.js	v18.x.x
Chrome Browser	Latest Stable
ChromeDriver	131.x.x
Selenium WebDriver	4.x.x
Mocha	10.x.x

## Test Execution Steps

1. Clone the repository
2. Install dependencies: `npm install`
3. Update test data in `config/testData.js`
4. Run tests: `npm run test:mocha`
5. View HTML report: `test-results/index.html`

## Evidence

- **HTML Report:** Available in `test-results/index.html`
- **Screenshots:** Captured automatically on failure in `screenshots/` directory
- **Console Logs:** Detailed step-by-step execution logs in terminal

## Prepared By

**QA Engineer:** Kabir Khadka **Date:** 12/22/2025

## Conclusion

The automated signup flow for the Authorized Partner platform has been successfully implemented and tested. All test scenarios passed successfully with 100% pass rate. The automation framework follows industry best practices with Page Object Model design pattern, proper error handling, and comprehensive reporting.

The solution is production-ready and can be easily integrated into CI/CD pipelines for continuous testing.

**Status:**  APPROVED FOR DEPLOYMENT
